# miniLUCCA

LUcerne Complex and CALcified PCI Workshop

**Thursday, September 22, 2022**

Art Deco Hotel Montana, Lucerne

**Friday, September 23, 2022**

XUND Bildungszentrum Gesundheit Zentralschweiz, Lucerne

herzlich, kompetent, vernetzt

# Dear Colleagues,

Treatment of complex coronary disease involves different diagnostic and therapeutic tools and it can be quite challenging to decide what the best treatment for that particular patient is.

At miniLUCCA we invite you to participate in these discussions. Intravascular imaging, various tools of calcium modification and mechanical support are the three main pillars of our course. Additionally, we will focus on the use of drug coated balloons in complex coronary disease.

3 LIVE cases will be performed by distinguished operators and in-between we'll hear interesting talks on the above mentioned topics.

We want this course to be interactive and thought provoking and I encourage you to be part of the lively discussions.

I'm looking forward to meeting you in the beautiful town of Lucerne @ miniLucca.

Best regards,

A handwritten signature in black ink, appearing to read 'Florim Cuculi', with a stylized circular mark at the beginning.

Prof. Dr. med. Florim Cuculi

Co-Chief Physician Cardiology Heart Centre Luzern, Lucerne Cantonal Hospital
